

HOWLER PRESENTS · PREPARED FOR MILK & COOKIES

Pulse. Your event's data, finally **working** for you.

Howler is the Experience Operating System for live events, and Pulse is our new flagship product: one white-label platform that turns your ticketing, cashless and web data into insight, action and results, in your brand, on your phone.

One loop that never stops turning · **not five disconnected tools**

Not another BI tool

Pulse doesn't just show you the numbers, it acts on them, in the same place.

Not another email tool

Audiences come from your live event data and stay current on their own.

Not another tab

An installable app that taps you on the shoulder when a number matters.

Live dashboards with the Owl one tap away. Screens are illustrative; the numbers are Milk & Cookies' real Pulse data, pulled live on 9 July 2026.

"See what's happening, act on it, and prove the results. One platform, one login, one living loop: the longer you use Pulse, the better it gets."

WHAT YOU GET

Everything an organiser needs, in one place

SEE · know what's happening without digging

📊 Live dashboards, mobile-first

🦉 Every number explained by the Owl

📅 A personal morning briefing

✉️ Digests to your inbox, on schedule

🍷 Share any insight in a tap

🎯 Goals with pace & forecast

"Open the app and you already know what changed and what to do."

ASK · your own AI analyst plain language in, grounded answers out

💬 Ask anything, in plain language

📊 Charts back in the chat

🔒 Answers only from your own data

⚡ Turn an answer into an action

"Your own analyst, in your pocket."

⚡ ACT · reach the right people from cohort to campaign in minutes

🎯 Audiences that never go stale

✉️ On-brand email & SMS, drafted for you

🔄 Journeys that run themselves

✅ Your approval before anything sends

📊 Every send tracked to results

"Personalised outreach to a precise audience, with the results measured."

📧 🌞 Your Friday briefing · Milk & Cookies

from Milk & Cookies via Pulse · Fridays 07:00 · to the exec team

Morning! The short version: M&C JHB | 26 stands at 17 812 tickets, 99% of the 18 000 goal, with R18.96m gross. General Access Phase 1 leads (2 877); Golden Circle holds 1 782. 188 tickets to go.

SUGGESTED ACTIONS

- **Recover the 3 396 abandoned carts:** 188 sales closes the goal
- **Send "Everyone's going. Are you? 🍪"** to the 18–22 audience (1 775 reachable)
- **Set the sell-out alert** at 18 000 tickets

The scheduled digest, built on Milk & Cookies' live numbers: a role-specific read of the week, with the next actions attached.

One brain, every channel

The same Owl, whichever door you walk through: the **Howler Pulse app** · **WhatsApp** · **ChatGPT** · **Claude**. Same answers, same security boundary, only ever your data.

MEET YOUR TEAM WHERE THEY ARE

One brain. Every channel.

At the centre sits **the Owl, one brain** that knows your events, your sales and your audiences. Ask on the couch, at the gate, or at your desk: same Owl, same answer.

How big is our abandoned-cart audience, and where are we against the ticket goal?

Your **Abandoned carts** segment holds **3 396 contactable people**. Ticket sales stand at **17 812 of the 18 000 North Star (99%)**, with General Access Phase 1 the top seller at 2 877.

in ChatGPT & Claude · via the Pulse connector · scoped to your events

🔒 One brain, one boundary

Every door goes through the same server-side scope gate: the Owl answers **only your events**, grounded in your data, it quotes, it never invents. Keys are read-only and revocable per client.

FOR THE GROWTH TEAM

The marketer's dream, on one platform

Everything a growth marketer normally stitches together across five subscriptions, running on **one live dataset**. No exports, no stale lists, no copy-paste between tools.

Design with AI

Ad audiences

mirrored to your ad accounts

Abandoned carts → Meta Custom Audience

3 396 synced · auto-sync daily

Healthy

Buyer Age 18 to 22 → TikTok

1 775 synced · 1 750 SMS-reachable too

Healthy

Already bought → exclusion list

17 812 buyers leave the ads automatically

Healthy

Emails & phones are hashed before they leave Pulse, the platforms never see raw contact details.

The Owl designs the email (that subject line is a real draft in your account); the audiences are your real segments, mirrored daily.

Complex journeys, simple setup

1 · Reminder email

3 396 enrolled

2 · +4h nudge

58% opened

3 · +24h promo SMS

31% clicked

✓ 188 recoveries would close the 18 000 goal · buyers auto-exit

Your real Abandoned carts segment (3 396 people) worked automatically: timed steps, per-step copy and promo, true real-time enrolment. Step rates shown are illustrative.

"From seeing a cohort to reaching it, with the results measured, without leaving the platform. That's the whole pitch."

Pulse · flagship of the Howler Experience OS

Page 4 of 6

Event Ops · your operations command centre

A live view of how the whole event is **flowing**: the gates, the bars, the devices, the crowd. One phone-first console instead of the clipboard, the spreadsheet and the frantic WhatsApp group.

📍 Your venue plan, live

🔥 Hotspots as they form

👤 Bar & operator performance

📶 Every device accounted for

📶 Connectivity watched for you

⚡ Updates to your phone all night

Your venue's own site plan, live: every station pinned, heat showing where the crowd is spending right now, and a dark station flagged the moment its data stops flowing.

Bar & operator performance, live: the lane's width is money flowing through that operator's till. Thabo is carrying Main Bar; Kea's lane has run dry, someone should check till 3. Names illustrative; the view is real.

📄 At event close

Every device accounted for, and a full history of the night.

📱 The whole night, one thread

Scroll the night's story at the debrief, from doors to last call.

🔔 You'll know first

A hotspot forming or a station going quiet reaches your phone first.

ONE PARTNER, END TO END

The Howler One stack: **one experience, one dataset**

Ticketing

The box office: ticket sales, tiers & releases, access control and scanning at the gates, every buyer and every entry, captured from the first on-sale minute.

Cashless Payments

Tap-to-pay across bars, vendors and top-ups: faster queues, higher spend, zero cash risk, and every transaction lands as live data, per station.

SuperApp

The fan's companion: tickets, cashless top-ups, line-ups and offers in one place, a direct, ownable channel to every attendee, before, during and after.

VIP Table Management

Premium done properly: table inventory, bookings and minimum spends, hosted service, your highest-value guests, managed and measured.

Pulse

The brain of the stack. Every ticket scanned, every tap at a bar, every SuperApp session and every VIP booking flows into one governed dataset, where the Owl reads it, your team acts on it, and the results come back measured. Insight → action → results, across the whole operation.

ONE STACK · ONE DATASET · ONE BRAND EXPERIENCE · ONE PARTNER

A tracked inbox with your Howler team

Settlements that file themselves

Fully white-label, your brand everywhere

Your data, scoped to you, never shared

POPIA-safe by design

Never locked in

Where to from here

You're 188 tickets from the 18 000 North Star, and there are 3 396 abandoned carts sitting in Pulse waiting to be asked nicely. **Let's close the goal together, live on your data.**
